

Remote Student Framework
for Securing Exams

NEWSLETTER 1

Kick-Off Meeting

HIGHLIGHT

RSMF (Remote Student Framework for Securing Exams) is a project which has as objective to provide a well-tested, secured, quality assurance path for students to giving exams remotely.

Therefore, any educational institution that provides a distance-learning course can benefit from the streamlining and cost-effective solution.

RSMF will include all the necessary results to be coherent and successfully implemented:

- R1- Accreditation Monitoring Framework for Securing Remote Exams
- R2- Remote Exams Guide book for Higher Education and
- R3- Remote Student Monitoring Platform

RSMF Project partners were met virtually on 03.12.2021.

During the kick-off meeting they discussed about the project objectives, target group, project results and activities.

The RSMF research team is completing the first project result. After preparing the questionnaires and distributing them to university students, faculty, and administrators, the project's partners evaluate and analyze the data in order to determine the capability of HEIs (Higher Education Institutes) in each nation.

PARTNERS

RSMF project is a 24-month initiative, carried out jointly & coordinated by 5 partners from 4 EU countries (PL, CY, GR, IT)
